Subject: OIAI Topic Tomorrow

I just got off the NSR/Title V permit call where this was one of the issues. Greg gave me the heads up that you are slated to talk about this in tomorrow's call and I didn't know if any of your staff was on the call (I dial in a bit late and don't always have all the names). Nothing too useful except that OAQPS supports using the memo, and not waiting for a rule, to begin implementing- but that at least two regions' staff, Region 3 and Region 4, spoke up about not doing anything until there was a rule. OGC said that there would be some changes from the earlier proposal but that it was still good bones to use with applicability requests that the regions get. OAQPS is setting up a share point to share Q&A and determinations from the regions. I raised the point that some of these issues that seem like OIAI issues may turn out to be PTE issues, and that they require a bit more thought in this case as to what is being unraveled.

I plan to call in tomorrow (I usually don't unless asked to participate).
